3. (Once Amended) A window decoration in the form of a single-layer roller blind which can be wound up at its upper side that is capable of providing sun protection, the window decoration, when brought into a condition ready for use, comprises a first face extending in a horizontal direction over substantially the full width of the window decoration and a second face extending in the horizontal direction of the window decoration, the first face transmitting substantially no incident light, the second face subduing the incident light in such a manner that a person present at his workplace in an inner space provided with the window decoration can still look outside through the second face, the first face being located above the second face.

4. (Twice Amended) A window decoration according to claim 1, wherein the second face extends over at least substantially the full width of the window decoration.

5. (Twice Amended) A window decoration according to claim 1, wherein the first and the second face adjoin each other.

6. (Twice Amended) A window decoration according to claim 1, wherein the second face extends down to a lower side of the window decoration.

7. (Twice Amended) A window decoration according to claim 1, wherein the first face extends up to an upper side of the window decoration.

8. (Twice Amended) A window decoration according to claim 1, wherein the first and the second face each have a rectangular shape.

9. (Twice Amended) A window decoration according to claim 1, wherein the first face is formed by horizontal slats of a first type of non-light-transmitting design, and that the second face is formed by horizontal slats of a second type of light-transmitting design.

10. (Once Amended) A window decoration according to claim 9, wherein the slats of the second type are perforated.

11. (Twice Amended) A window decoration according to claim 9, wherein the slats of the first type are of non-perforated design.

12. (Twice Amended) A window decoration according to claim 1, wherein the first and the second face are formed by vertical slats, while to each of said slats it applies that it transmits at least substantially no light for first portion of the relevant slat, said first portion forming part of the first face and partially transmits light for a second portion of the relevant slat, said portion forming part of the second face.

13. (Once Amended) A window decoration according to claim 12, wherein said second portion is of perforated design.

14. (Twice Amended) A window decoration according to claim 12, wherein the first portion is of non-perforated design.

15. (Twice Amended) A window decoration according to claim 3, wherein the first face is formed by a first cloth of the roller blind, said first cloth transmitting at least substantially no light, and that the second face is formed by a second cloth of the roller blind, said second cloth transmitting incident light partially.

16. (Once Amended) A window decoration according to claim 15, wherein the cloth of the second face consists of gauze.

17. (Twice Amended) A window decoration according to claim 2, wherein the first face is formed by pleated, sheet-shaped material such as cloth having a coating which transmits at least substantially no light, and that the second face is formed by pleated, sheet-shaped material such as cloth having a coating which transmits light at least partially.

18. (Once Amended) A window decoration according to claim 17, wherein the sheet-shaped material of the second face is perforated.
